PROFILE

Product-minded front-end developer focused on React, UI engineering, and responsive web experiences. I own client work from requirements and user flows through implementation, debugging, deployment, and iteration. Comfortable translating non-technical feedback and Figma concepts into accessible, reusable interfaces with clear visual hierarchy.

CORE SKILLS

Frontend:	JavaScript (ES6+), TypeScript, React, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, SPA, REST APIs
Design & Product:	UI engineering, Figma-to-code, user-flow planning, visual hierarchy, typography/layout, responsive design, accessibility, interaction states, stakeholder requirements
Workflow:	Git, GitHub, browser DevTools, debugging, code reviews, Agile, Netlify, VS Code
Additional Engineering:	Authentication, user data, database-backed features, client/server fundamentals; exposure to Clerk, Supabase, Stripe, Express, and Resend through project work

EXPERIENCE & SELECTED WORK

Independent Front-End Developer | Tracy Nguyen Counselling | Client Project | [Live Site](#)

- Owned the website end to end for a real non-technical client, translating business needs and feedback into user flows, page structure, responsive UI, and production features.
- Designed and developed a bilingual English/Vietnamese counselling website with reusable React components, clear content hierarchy, accessible markup, and responsive layouts.
- Built the React/Vite front end with React Router navigation, service and FAQ pages, resources/blog/course surfaces, and contact/preliminary questionnaire flows.
- Expanded beyond the original front-end scope as requirements grew, learning backend concepts for authentication, user data, database-backed functionality, payments, and email integrations.
- Debugged and deployed the live site, iterating from client feedback with browser DevTools, documentation, and systematic testing.

Front-End Developer (Contract) | Hit the Books | 2024

- Built and maintained reusable React UI components from Figma wireframes, translating visual specifications into responsive interfaces.
- Integrated REST APIs and debugged front-end behavior across data fetching, rendering, and UI states.
- Collaborated through Git/GitHub, code reviews, daily stand-ups, and Agile sprint planning to deliver and refine front-end work.

Admin Support | PGTCO | 2024 - Present

- Support administrative and technical workflows across online systems, file organization, onboarding coordination, stakeholder communication, and remote-first operations.

SELECTED PROJECTS

Angelina Interpreting | [Next.js](#) / [React](#) / [TypeScript](#) / [Tailwind CSS](#) | [Live Site](#)

- Built a bilingual Vietnamese-English service website with responsive navigation, service and credential sections, schedule request flow, contact form, SEO metadata, structured data, and Vercel deployment.

Swim With Leah | [Next.js](#) / [React](#) / [TypeScript](#) / [Tailwind CSS](#) | [Live Site](#)

- Built a responsive coaching website with lesson/service sections, mobile navigation, contact form route backed by Resend, SEO metadata, sitemap, and structured data.

Com Chay Ngoc Hanh | [Next.js](#) / [React](#) / [TypeScript](#) / [Tailwind CSS](#) | [Live Site](#)

- Built a Vietnamese vegan restaurant site with menu and gallery sections, ordering calls to action, responsive layout, and polished visual/content hierarchy.

EDUCATION & CERTIFICATIONS

University of Toronto - Web Development using React, 2024

freeCodeCamp - JavaScript Algorithms & Data Structures, 2025; Front End Development Libraries, 2025; Responsive Web Design, 2024
